8th February 2023

To May it May Concern,

I am writing to highly recommend Liu Aofan for admission to your school. As his lecturer for Database, I have had the privilege of getting to know him as a student and observing his exceptional academic ability.

Throughout the duration of the course, Liu Aofan consistently demonstrated his strong grasp of the course material, eagerness to learn and actively participate in class discussions. He consistently produced high-quality work, often going above and beyond the expectations set forth in the assignments. His insightful contributions to class discussions and ability to apply course concepts to real-world scenarios were particularly impressive and often sparked new ideas among classmates.

In addition to his strong academic skills, I have been impressed by Liu Aofan's character and work ethic. He is a dedicated and responsible individual who consistently strives for excellence in everything he does. He is well-respected by his peers and has a positive attitude that makes him a pleasure to work with.

I am confident that Liu Aofan will continue to excel in graduate Program. He has the intelligence, drive, and character to succeed in any academic or professional setting. Please do not hesitate to contact me if you need any further information.
