## Recommendation Letter

I am pleased to have the opportunity to write this letter of recommendation on behalf of Liu Aofan. We have known each other for the better part of three years. This student completed one of my course, Computer Graphics, in the 202104 academic year. Computer science and technology requires a level of attention to detail, curiosity and purpose that challenges most people. Liu Aofan pleasures every single opportunity to demonstrate talent. In the Computer Graphics, student impressed me in the development of innovation project and achieved award. In this process, student not only completed the presentation of research elements, but also used good framework elements. Owing to student diligence, student received good grade in both Computer Graphics and other subjects.

Computer Graphics course is designed to challenge students and push them to their limits. I believe in giving students ample scope to enable them to clear the confines of their comfort zone. Liu Aofan handle onto this quite quickly and started to see just how important uniting his technical craft with collaborative skills was. As a strong research skill, student was a perfect fit for a different role in group work. It was often the case that Student would assist in the prompt resolutions of disputes and give peers a path to common ground. Balancing both cooperative and independent qualities, he can either be an indispensable team player or an assertive leader. It is my belief that Liu's industriousness, passion, and dedication make an ideal candidate for your program. With this in mind I wish to extend my highest recommendation, and hope that you give a favorable consideration. If you have any questions regarding Liu's candidacy, please do not hesitate to contact me.

Yours sincerely,

Date: 10<sup>th</sup> March 2023
