附　件:

Dear Authors,

We are delighted to inform you that the following submission was accepted for presentation at ICASSP 2025:

4304: RefleXGen:The unexamined code is not worth using

This year, ICASSP was highly competitive as we received a record-high number of submissions. Each submission received at least two reviews. You can access the final reviewer comments in your Author Console at https://cmt3.research.microsoft.com/ICASSP2025/. We hope that you will be able to use this feedback to improve the camera-ready version of your paper.

The camera-ready paper submission deadline is 13 January 2025 (11:59 PM PST). Please note that substantial changes to the reviewed paper are not allowed, except for those which address specific reviewers' comments, as disclosed in the rebuttal, and improve the paper. We reserve the option to use the accepted version of your paper if we feel that the updated version differs substantially from what was accepted. The revised paper has a maximum length of 4 pages, plus an optional fifth page for references only, following the style in the Author Kit (https://2025.ieeeicassp.org/author-kit-instructions/).

All accepted papers must be presented in person at the conference. In addition, at least one author of the paper must register for the conference at the author rate and link their paper to the registered author. One registration at the author rate can cover up to four papers presented at ICASSP or its satellite workshops as long as the registrant is an author on all papers. The registration details will be announced shortly on the conference website. Note that we require you to complete registration by January 13, 2025. At least one author should plan to attend ICASSP in person to present the paper. We will send a reminder to register when it is launched.

Authors must upload their paper to PDF eXpress (https://ieee-pdf-express.org) using the conference ID 65056X prior to uploading it through CMT. This will generate an IEEE-compatible file for the conference proceedings and IEEE Xplore. Authors must also submit their copyright form to IEEE. There will be a link in the submission form within CMT which directs you to the IEEE electronic copyright form. Once you submit the IEEE electronic copyright form, please download the completed form confirmation (PDF) and upload it to CMT.

IMPORTANT: Authors must follow the following requirements for both the CMT paper record AND the PDF manuscript uploaded:
The paper title should be in title case.
Author names, affiliation, and author order must be the same in the paper as in the metadata entered in the CMT system (and no authors should be missing on either).
Authors may not be added if they were not included in the initial submission.
Only Latin characters must be used in the names and capitalized properly (the first letter of each word should be capitalized, with optional capitalization of the first letter after a hyphen).

We look forward to the presentation of your paper at ICASSP 2025.

Note: All foreigners need an e-conference visa (not business visa) to attend ICASSP. Please start on this at the

earliest. The instructions regarding the visa have been shared in a separate email.

Bhaskar D. Rao, Isabel Trancoso, Gaurav Sharma, Neelesh B. Mehta
